Umano Medical

((•)) Umano connect
FOR A SIMPLIFIED, CONNECTED FUTURE

We kept everything you like about our ook snow platform beds and brought them to the next level by integrating (●) umano connect technology.

Take the first step to a simpler and connected future.

With Umano Connect™, bed status data[1] and event logs that were previously only available at the bedside can now be accessed remotely, in near real-time, by staff members.

This proactive monitoring[2] enables your organization to make fact-based assessments and track fall prevention efforts from the workstation.

[1] Umano Connect™ is available on all Umano Medical beds equipped with a smart screen.
[2] Visual notifications only. For nurse call management, bed must be integrated with proper UL1069 compliant third-party system.
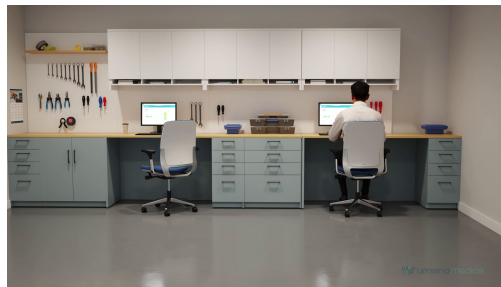

EMPOWER YOUR STAFF

From the patient room to the nurses' station and the maintenance department, all your teams come together with ((•)) Umano connect dashboard.

Care teams
on the night shift can visualize and monitor bed status events and in-bed patient movements to intervene only when necessary, saving valuable staff time and improving patient care.

Maintenance teams
can track bed error codes to make troubleshooting procedures more efficient and reduce bed downtimes.

Nurse Managers
can manage bed groups to assess if fall prevention protocols are being followed throughout their care units.

For a simplified, connected future
